IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michelle Holoubek on 8/26/08.

The application has been amended as follows:

#### **IN THE CLAIMS**

Claim 15 has been rewritten as:

15. A computer-readable medium encoded with a program, said program comprising instructions to perform a method, the method comprising:

controlling a DC source to provide a DC voltage to at least one electrode to provide a clamping force on an object;

controlling an AC source to provide a first AC voltage with a first amplitude and a first phase via a first conductor to the at least one electrode to capacitively detect the object, wherein said AC source is in series with said DC source;

controlling a second AC source to provide a second AC voltage to a second conductor, the second AC voltage having a second amplitude and a second phase, which are substantially equal to the first amplitude and first phase, respectively;

determining the clamping force of a support structure on the object by determining the difference in capacitance between the support structure with the object present on the support structure and the support structure without the object present on the support structure;

deriving from the clamping force a maximum acceleration of the support structure and the object during a movement which causes movement of the support structure relative to the object; and

instructing to move the support structure and the object, wherein an acceleration of the support structure and the object is less than the maximum acceleration.

Claim 22 has been cancelled.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 are allowable over the art of record because the prior art does not teach or render obvious the entire combination including specifically an apparatus comprising a second AC source connected to a second conductor, wherein a controller is configured to control the second AC source to provide a second AC voltage having a second amplitude and a second phase which are substantially equal to the a first amplitude and first phase provided by a first AC source connected to a second end of a first conductor, and a DC source in series with said first AC source to provide a DC voltage to one electrode to provide a clamping force on an object.

Claims 3,4 and 6 are allowable as they depend from claim 1.

Claim 7 are allowable over the art of record because the prior art does not teach or render obvious the entire combination including specifically an apparatus comprising a second AC source connected to a second conductor, wherein a controller is configured to control the second AC source to provide a second AC voltage having a second amplitude and a second phase which are substantially equal to the a first amplitude and first phase provided by a first AC source connected to a second end of a first conductor, and an actuator connected to the controller constructed to move a support structure, said controller being structured to determine a clamping force on an object and to provide the actuator with a maximum value for the acceleration on the object based on the determined clamping force.

Claims 8, 18 and 19 are allowable as they depend from claim 7.

Claims 10 and 15 are allowable over the art of record because the prior art does not teach or render obvious the entire combination including specifically a method comprising determining a clamping force provided by a DC source by determining the difference in capacitance between a support structure with the object present on the structure and without the object present on the structure, and deriving from the clamping force a maximum acceleration of the support structure which causes movement of the structure relative to the object.

Claims 11 and 12, and 20 and 21 are allowable as they depend from claims 10 and 15 respectively.

Claim 17 is allowable over the art of record because the prior art does not teach or render obvious the entire combination including specifically a method comprising determining a clamping force provided by a DC source by determining the difference in capacitance between a support structure with the object present on the structure and without the object present on the structure, and comparing the clamping force to a minimum clamping force suitable to hold the object on the structure during movement of the structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOHN ZHU whose telephone number is (571)272-5920. The examiner can normally be reached on M-F, 8-4:30.
